CONFERENCE TOPICS

International Academic Conference “e-methodology” is dedicated to the difficulties connected with research in social sciences and humanities conducted by means of the Internet, as well as the opportunities that it provides. We accept theoretical lectures on this subject and lectures presenting the results of research conducted on or by means of the Internet (understood as a research environment and/or a research tool). We would like the authors to pay special attention to the specificity of “Internet methodology”.

We propose three sections:

- 1) **“About the Internet” – Theory** (Theoretical papers on the difficulties and the opportunities created by using the Internet in scientific research)
- 2) **“On the Internet” – Research** (The results of research conducted by means of the Internet)
- 3) **“With the Internet” – Projects** (Project reports and research/educational projects presenting the opportunities provided by using the Internet)
